

Carbon Reduction Plan

Equashield

Equashield is committed to achieving net zero emissions by 2045.

Baseline Emissions Footprint vs Current Emissions Footprint

Baseline emissions are a record of the greenhouse gasses that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Emission Scope	Baseline Emissions, 2025 (tonnes CO2e)	Current Emissions, 2025 (tonnes CO2e)
Scope 1	0.0000	0.0000
<i>Energy Purchased (Sites, Other Emissions)**</i>	0.0000	0.0000
<i>Company Cars (Company Cars, Other Emissions)</i>	0.0000	0.0000
<i>Delivery Vehicles (Delivery Vehicles, Other Emissions)</i>	0.0000	0.0000
<i>Air Conditioning / Refrigerants (Other Emissions)</i>	0.0000	0.0000
Scope 2	0.0000	0.0000
<i>Electricity (Sites, Other Emissions)**</i>	0.0000	0.0000
Scope 3	22.8817	22.8817
<i>Purchased Goods and Services (Sites, Other Emissions)**</i>	0.0000	0.0000
<i>Capital Goods (Other Emissions)</i>	0.0000	0.0000
<i>Fuel & Energy Related Activities (Other Emissions)</i>	0.0000	0.0000
<i>Upstream Transportation & Distribution (Freighting Goods (Upstream), Other Emissions)</i>	0.0031	0.0031
<i>Waste Generated in Operations (Waste Disposal, Other Emissions)</i>	0.0000	0.0000
<i>Business Travel (Hotels, Air Travel, Public Transport & Hire Cars, Employee Owned Vehicles, Company Cars, Other Emissions)</i>	1.7901	1.7901
<i>Employee Commuting (Home Working, Employee Commuting, Other Emissions)</i>	0.2417	0.2417
<i>Upstream Leased Assets (Other Emissions)</i>	0.0000	0.0000
<i>Downstream Transportation & Distribution (Freighting Goods (Downstream), Other Emissions)</i>	20.8468	20.8468
<i>Processing of Sold Products (Other Emissions)</i>	0.0000	0.0000
<i>Use of Sold Products (Other Emissions)</i>	0.0000	0.0000
<i>End of Life Treatment of Sold Products (Other Emissions)</i>	0.0000	0.0000
<i>Franchises (Other Emissions)</i>	0.0000	0.0000
<i>Investments (Other Emissions)</i>	0.0000	0.0000
Total	22.8817	22.8817
** Generated from renewable sources	0.0000	0.0000
* includes WTT		

Carbon Reduction: Projected vs Actual

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets. We project that carbon emissions will decrease over the next years to 2.2882 by 2045 this is a reduction of 90%

Information About our Organisation

Scope 1 - There are no emissions associated with Scope 1 Scope 2 - There are no emissions associated with Scope 2 Scope 3 Category 5 Waste Generated in Operations - There are no emissions associated with Scope 3 Category 5

Additional Details About our Emissions and Targets

Year	Comments

Carbon Reduction Projects

The following environmental management measures and projects are currently in progress or have been completed since the 2025 baseline.

Actions In Progress

Improve data granularity and stakeholder data quality

Target Completion Date: 31/12/2027

Objective

To improve the accuracy, consistency and reliability of the organisation's carbon footprint by increasing the level of detail and quality of data obtained from internal stakeholders and external suppliers.

Target

Increase the proportion of emissions calculated using detailed, source specific data obtained directly from stakeholders, suppliers and service providers across key emission categories.

Action, Improvement or Control

Processes and communication channels will be strengthened to support the collection of more detailed and accurate emissions related data from relevant stakeholders and suppliers. Data requests will be standardised where appropriate to encourage the provision of higher quality information, such as actual consumption figures, activity data and source specific records rather than aggregated or estimated values.

Expand carbon data collection in line with PPN 006 requirements

Target Completion Date: 31/12/2027

Objective

To strengthen organisational carbon data collection processes to support alignment with PPN 006 requirements, taking into account anticipated future updates and evolving government expectations.

Target

Improved collection and management of emissions data across scope 1, scope 2 and relevant scope 3 categories, including supply chain-related emissions where appropriate.

Action, Improvement or Control

Review existing carbon data collection processes in the context of PPN 006 requirements and expected future developments to identify gaps in data coverage and quality. Update internal approaches, tools and guidance to support more consistent and appropriate data capture. Engage with suppliers, where relevant, to encourage improved availability of emissions data, and consider how data requirements may be reflected within procurement and contract management processes over time. Provide proportionate guidance to internal teams to support implementation.

Strengthen sustainability governance

Target Completion Date: 31/12/2027

Objective

Strengthen sustainability governance across international operations to support consistent environmental standards as the organisation expands into new markets. This will help ensure sustainability considerations are embedded into operational and strategic decision-making.

Target

Develop and implement sustainability policies and governance processes that can be applied consistently across existing and future international locations. Improve oversight of sustainability performance across global operations.

Action, Improvement or Control

Review existing governance processes and introduce sustainability policies covering areas such as travel, procurement, and waste management across international operations. Establish regular sustainability reporting and performance reviews to support expansion into new markets.

Completed Actions

Declaration and Sign Off

This carbon reduction plan has been completed in accordance with PPN 006 and the associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard ¹ and uses the appropriate Government emission conversion factors for greenhouse gas company reporting ².

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard ³.

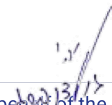

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).
